

Professional 141 Intercooler cleaner

Improves the cooling performance of the charge-air cooler and rids the radiator of dirt from construction site and insect contamination, without needing complex removal. Protects against salt water and aluminium corrosion after cleaning.

Properties

- ✓ Optimal material compatibility
- ✓ Prevents engine damage caused by poor cooling (due to the radiator being dirty)
- ✓ Saves time and money, as it is not necessary to remove the radiator
- ✓ Reliably and carefully removes construction site dirt and insects
- ✓ Provides protection against salt water
- ✓ With aluminium corrosion protection

TUNAP 1805 HDR Combination Probe (60cm)

60cm combination probe for the TUNAP 1800 high-pressure cleaner. For intercooler cleaning using 141 intercooler cleaner and for water flushing.

Properties

- ✓ Regulates the high-pressure cleaner's spraying jet
- ✓ No damage to the cooling grooves
- ✓ Emission angle of 90°
- ✓ Excellent rinsing effect
- ✓ Optimal spray pattern
- ✓ Practical bayonet mount

Professional 138 Intake System Cleaner

Highly effective active solvent especially for cleaning typical contamination and deposits around the air intake and throttle valves.

Application area

- ✓ Cleaning of throttle and throttle units
- ✓ For making moving parts, including idling actuators accessible
- ✓ Cleaning of carburetors (internally and externally)
- ✓ Rinsing of bore holes and nozzles

Instructions

Liberal spray the whole surface of the parts to be cleaned and allow the agent a few minutes to soak in. Rinse off any dislodged dirt by spraying again with product 138. Residual agent remains on the surface as a protective layer.

Notice

- ✓ Only use for petrol engines!
- ✓ For better cleaning results it is recommended to dismantle throttle units and similar components in order to be able to clean difficult to access places optimally.

TUNAP Product Information- Cleaning solutions for Inlet Manifold and Exhaust Systems

Products that are designed to help make your garage standards even better.

- ✓ Prevents engine damage
- ✓ Avoid costly repairs
- ✓ Safe and easy to use
- ✓ Sustainable & environmentally friendly

microflex® 926 Carbon Remover

The unique XGel technology dissolves carbon contamination extremely quickly. The outstanding surface adhesion and coating properties ensure a very short penetration time and excellent dirt removal. Ideal for cleaning components contaminated with carbon deposits in the intake and exhaust gas system.

microflex® 925 EGR System Cleaner

The innovative XFoam technology dissolves stubborn contamination in the intake and exhaust gas system extremely quickly. The excellent wetting properties ensure a short penetration time, extremely good dirt removal and excellent flow behaviour. Ideal for cleaning larger components in the intake and exhaust gas system.

Before

After

"I was very surprised by the effectiveness of the EGR System Cleaner (925). It softens very hard carbon build up and is easily washed out of intakes. Very handy for those without acid baths or for manifolds that can't go in them"

- Joshua Nicholls- Technician, Edge Automotive.

TUNAP 19310 EGR Pressure Cup Spray Gun

Special pressure cup spray gun for use with the 925 EGR System Cleaner. The HD-PE pressure cup ensures the safe use of cleaning chemicals. With the 5mm EGR probe developed specifically for this application, you can reach contamination in tricky-shaped parts.
